Orlando, FL

Supporting mission-critical airport, utility, and industrial control systems through troubleshooting, modifications, commissioning assistance, and operational support.

Overview

BR Controls LLC provides hands-on PLC and SCADA support for live, mission-critical systems in airport, utility, and industrial environments. Work is focused on troubleshooting, system modifications, commissioning assistance, and documentation support for systems operating 24/7 where downtime and risk must be carefully managed.

Specialized Experience

- Airports and baggage handling systems (BHS)
 - Water and wastewater utilities
 - Material handling and conveyor systems
 - 24/7 operational facilities
-

Representative Experience

Airport Baggage Handling Systems

- Diagnostic support and PLC troubleshooting
- Commissioning support during system modifications and upgrades
- Supporting implementation of control system updates within active terminal environments

Water & Wastewater Infrastructure

- SCADA and PLC system troubleshooting
- Updating documentation and modifying controls
- Operational support for maintenance and upgrades

Industrial Material Handling

- Troubleshooting controls for conveyor systems
- Modifying legacy PLC hardware and software
- Support for system startup and commissioning

Services

- Emergency controls support
 - Troubleshooting and corrective maintenance
 - PLC and SCADA modifications
 - PLC migration and modernization support
 - Commissioning and startup assistance
 - Controls documentation updates
 - Legacy system support
-

Systems & Platforms

• Allen-Bradley PLCs • Studio 5000 • Factorytalk • Legacy PLC Systems • Legacy SCADA Systems	• Siemens PLCs • TIA Portal • Siemens WinCC SCADA • AutoCAD
---	--

Typical Engagements

- Rapid diagnosis and correction of PLC, HMI, and SCADA issues to restore operations and reduce downtime.
- Safe modification of legacy control systems where documentation may be incomplete or outdated.
- Supporting commissioning and system upgrades in operational environments
- Implementing changes to active SCADA projects with minimal downtime
- Maintaining and updating AutoCAD control drawings during active projects
- Coordinating changes with operations, maintenance, and engineering teams

Delivery Approach

- Support-focused, risk-aware execution
- Changes implemented with consideration for operational continuity
- Clear communication with client staff before and after modifications
- Documentation maintained to reflect system changes

Scope & Role Clarity

- Support and implementation assistance only
- No stamped engineering services
- No engineer-of-record role
- No turnkey construction responsibility

Availability

- On-call or scheduled controls support
- Short-term or ongoing engagements
- Remote and on-site support depending on system needs

BR Controls LLC was founded by Benjamin Cummings, a Central Florida controls professional with more than 15 years of experience in the automation and controls industry.
